STATINTL

Reviewed P. L. 93-526 in view of
PLC reply to [REDACTED] I hope this
proposed memo is self-explanatory.
[REDACTED] had the action on this but
says he can't get to it in near future,
and if prompt action is necessary
maybe we'd better do it. I think
prompt action is called for so we're
not faced with an unacceptable
fait accompli in a month.

WPB

*Good memo suggest
you discuss with Syle
the French Rules material.
If no changes need to
be made on that basis
pls. analyze & proceed acc.
to instructions.*

STATINTL

MEMORANDUM FOR: 

Chief, Information Systems Analysis Staff

SUBJECT : Presidential Recordings and Materials
Preservation Act

1. Concerning your memorandum reflecting your discussion with Dick Jacobs as to the indexing of Watergate material, it is suggested that any indices compiled reference only those CIA documents that were publicly released by congressional committees, the White House or the courts. The remaining CIA documents should not be indexed since most involved collateral issues and were not directly related to the Watergate inquiry.

2. I would, therefore, suggest that no CIA material be entered in the indices unless it is first determined that it has been publicly released.
